

14TH INTERNATIONAL WORKSHOP ON ENTERPRISE & ORGANIZATIONAL MODELING AND SIMULATION (EOMAS)

11 - 12 JUNE 2018, TALLINN, ESTONIA
IN CONJUNCTION WITH CAISE 2018

EOMAS is a flagship annual event of the Association for Information Systems Special Interest Group on Modeling And Simulation ([SIGMAS](#)).

In modern enterprises, business process management, decision making, and modeling and simulation (M&S) play a significant role.

The main focus of EOMAS is on the role, importance, and application of modeling and simulation within the extended organizational and enterprise context. This context implies that systems and software applications are designed to enable certain business processes, and to facilitate interaction of the actors, the system, and the environment. Thus, application of modeling and simulation in this extended context involves a number of socio-technical aspects (Information Systems (IS), Enterprise Information Systems (EIS), Software Systems, and Business Systems, Business Processes, Human Interaction, etc.), as well as technical challenges as security, big data, etc.

EOMAS has been designed to provide a quality research outlet and networking opportunity for researchers, practitioners, and educators interested in the development and application of modeling and simulation within the enterprise and organizational context.

Important Dates

Submission:

March 30, 2018
(extended hard deadline)

Notification:

April 16, 2018

Camera-Ready:

May 28, 2018

Publication

All past papers of EOMAS were published in the Springer series of LNBIP or in Journal Special Issues and indexed by WoS.

CAISE
